

Week 3 SDL Instructions (5%)

There are 2 parts that need submission on week 4 (hardcopies).

1. First part is **Written Assignment 1**, a crossword puzzle,. Print it out and finish the puzzle.
2. Second part is watching the video as given in Lab 3 Qn 1 (duplicated here):
<https://youtu.be/2edXfAt2Kul>

For every Linux command used in the video, write down the equivalent Windows DOS shell commands used to perform the same tasks as when using the Windows app File Explorer. Follow the sequence of commands used in the video judiciously.

E.g.

Linux	Windows GUI	Windows Command Prompt
Bash prompt> cd / Bash prompt> ls	Mouse click on C drive to see what's in it	DOS prompt> C: DOS prompt> cd \ DOS prompt> dir
Bash prompt> cd /home/student Bash prompt> ls	Double click on student folder	DOS prompt> cd \Users\student DOS prompt> dir

You may watch “**Windows Basic Commands**” and “**Linux Basic Commands**” in BB to further your understanding before attempting this question.

At the back of the crossword puzzle page, write down in your own handwriting and in chronological order, the Windows commands needed as answer.

Feel free to clarify any doubts with your tutor.
